X original site

Describe the present and original (if known) physical appearance

Only four covered bridges remain in Erie County today. Three use the kingpost trussing system and one the Town lattice type. The attached inventory sheets describe each bridge in more detail.
Name: Harrington Covered Bridge

Location: T338 Conneaut Township
UTM: Zone 17 N 4635150 E 547375
Owner: Conneaut Township

Acreage: .05
Owner: c/o Norman Phillips, Chairman R.D.1 Albion, Pa. 16401

Stream: West Branch Conneaut Creek
Truss Type: Multiple Kingpost
Builder: William Sherman
Year: c. 1870

Length: 72 ft Width: 14 ft
Clearance: 12 ft Load: 4 tons.

Distinguishing Features: This multiple kingpost truss bridge has vertical siding and cut stone abutments. Its gable roof is covered with wooden shingles. The plain portal slopes inward toward the trussing system. In 1962 this bridge was repaired under supervision of the state highway department.

Condition: Good
Name: Gudgeonville Covered Bridge
Location: T460 Gira Township
UTM: Zone 17 N 4647800 E 560800 Acreage: .05
Owner: Girard Township c/o Ray Sanders, Supervisor
       R.D.# 1
       Girard, Pa. 16417
Stream: Elk Creek
Truss Type: Multiple Kingpost
Builder: William Sherman
Year: 1868

Length: 72 ft  Width: 14 ft
Clearance: 12 ft  Load: 3 tons

Distinguishing Features: The Gudgeonville Bridge is one of the most spectacular covered bridges in the state because of its location. Crossing Elk Creek in a deep valley, the bridge is a beautiful view in all seasons. Like Harrington, the Gudgeonville Bridge has narrow vertical siding, cut-stone abutments and a gable roof. Its transverse decking has 2 foot linear treadways.

Condition: Fair
Name: Waterford Covered Bridge
Location: T459 Waterford Township
UTM: Zone 17 N 4643560 E 585850 Acreage: .06
Owner: Waterford Township
        c/o Howard E. Proctor, Chairman
        R.D. #4 Bagdad Road
        Waterford, Pa. 16441
Stream: LeBoeuf Creek
Truss Type: Town
Builder: Richard Cross, architect; Charles & James Phelps, builders
Year: 1875

Length: 78 ft Width: 15 ft
Clearance: 10 ft Load: 3 tons

Distinguishing Features: Located just outside the small community of Waterford, this covered bridge uses the town lattice trussing system, the only one in the county to do so. It has wide, vertical plank siding and a wooden shingled gable roof.

Condition: Good
Name: Carman Covered Bridge
Location: T338 between Springfield & Conneaut Townships
UTM: Zone 17 N 4640750 E 547200 Acreage: .05
Owner: Springfield Township c/o Richard Walbridge, Chairman
R.D.
East Springfield, Pa. 16411
Conneaut Township c/o Norman Phillips, Chairman
R.B. #1
Albion, Pa. 16401
Stream: Conneaut Creek
Truss Type: Multiple Kingpost
Builder: William Sherman
Year: c. 1870
Length: 75 ft  Width: 14 ft
Clearance: 12 ft  Load: 4 tons
Distinguishing Features:
Like the Harrington and Gudgeonville bridges, the Carman bridge was built by William Sherma and it identical in style with its narrow, vertical siding, gable roof and cut stone abutments. Painted above the north portal is an advertisement for Sines & Wingate Clothing, a department store in nearby Conneaut, Ohio, which went out of business seventy years ago.
Condition: Fair.
Located in the far northwestern part of the Commonwealth the four covered bridges of Erie County are the only remaining in this part of the state. These four bridges are all that remain of what was once a total of fourteen for the county. Located on country roads they have managed to survive the hundred years since their construction. Three of the bridges were built by one builder William Sherman in the years 1868 and 1870. These three are identical in styling and use the multiple kingpost trussing system. The fourth bridge was built in 1875 with Richard Cross as the architect and Charles and James Phelps as the builders. This bridge uses the Town lattice truss developed by Ithiel Town in 1820.

These remaining covered bridges are the only surviving examples of a period and style of bridge building in Erie County, as well as the Commonwealth as a whole.
The covered bridge is an important and significant historic structure in the Commonwealth of Pa. Not only does Pa. have the most extant covered bridges today, it probably had the most during the height of the covered bridge period 1830 to 1875. Estimates have been made that Pa. once had at least 1500 covered bridges. (Allen, 1959: 51). Not only is the sheer number important but Pa. had the first known U.S. covered bridge, as well as the prototypes for most of the major truss types.

The first US covered bridge was located in Philadelphia over the Schuylkill, built in 1800 by Timothy Palmer, a master carpenter from Newburyport, Massachusetts. From the completion of this first bridge, the age of the covered bridge was upon Pa. Not only was the truss types of Burr and others first tried out in Pa., but the covered bridge spread as the local carpenter adapted it to the local problem of crossing the numerous small streams and creeks throughout Pa. The covered bridge is also important in the history of bridge building. The early stone arch bridges were really only practical on smaller streams and then in areas with an abundance of good building stone. The peak of the stone bridge is Pa. can be seen in the Rockville Bridge over the Susquehanna River built by the Pa. Railroad and contains a quarter of a million tons of stone. The covered bridge was the transition from the stone to the cast-iron in most places.

Since the heyday of the covered bridge they have been rapidly disappearing through neglect; flood, arson and progress. Prior to the Agnes Flood of 1972, Pa. had 271 covered bridges, spread across 41 of its 67 counties. Since that time the number has been decreasing at a fast rate. Because of their importance, the state level National Register Review Committee as well as the Office of Historic Preservation have embarked on a covered bridge survey and registration project. A survey form and inquiry letter were developed and mailed to county bridge engineers, historical societies, members of the Society of Industrial Archaeologists, the Theodore Burr Covered Bridge Society and numerous others. To date we have information on approx. 3/4 of the 41 counties containing covered bridges. Our results to date show that the number of covered bridges is down about a third from the 1972 figure of 271. Just since beginning our survey, two bridges have been destroyed by arson and one by an overloaded truck. It is because of
this rapid disappearance rate, as well as their significance to Pa.
in the history of transportation that we intend to nominate as many
as possible to the National Register of Historic Places. Because
of time and the immensity of the task a thematic nomination covering
the whole state is impossible. We are therefore nominating these
structures on a county or two county basis. All bridges constructed
after 1930 have been excluded unless the bridge has a significance
of its own. Bridge construction dates and builders are not always
readily available, therefore after exhausting the files of the bridge
engineers, historical societies and the archives, we have been
lenient with the bridges for which we could find no dates, mainly
on the view that very few have been built in the last 50 years and
that the registration of all of these fast disappearing resource
is valuable. Moved structures have been included in our nominations
for several reasons; firstly in all cases if these structures had not
been moved they would have been destroyed, secondly they still retain
their significance as examples of trussing types and while they have
lost their location they still retain an integrity of location in a
rural setting. Therefore we have tended to nominate every eligible
covered bridge in each county.
